

Reflare Certified Secure Developer  
Reflare Certified Secure Administrator  
Reflare Certified Secure Employee

## Product Fact Sheet

### Reflare Certified IT Security Training

Reflare delivers world class IT security training to improve individual, functional, and corporate security. PCI-DSS and ISO 27001 compliant, this cloud-based offering provides hands-on experience at an enterprise-wide scale.

Provide live security challenges for your tech employees to actively attack and repair vulnerable applications and gain practical security experience. Roll out meaningful, customized awareness training across the enterprise with ease. End users can train anywhere at any time. No need to organize training phases or schedule meetings. Let your talent develop business-critical IT security skills wherever there is internet connectivity.

#### Six Security Challenges Reflare Helps Organizations Manage

1. ISO27001, PCI-DSS 3.2, and Awareness compliance.
2. Train thousands of employees simultaneously.
3. Up-skill your talent with scalable and practical hands-on experience.
4. Develop security capabilities applicable to employee's workflow.
5. Manage the organization's IT security training activities from a single dashboard.
6. Provide coherent compliance reporting on IT security maturity and development.

#### Benefits for you and your team

**MANAGEABLE:** Control thousands of customer accounts using a central administrative interface. Look up individual trainees or summaries on groups or all your employee's IT Security development.

**SCALABLE:** Reflare certified trainings uses cloud infrastructure to scale on demand and meet the requirements of thousands of simultaneous sessions across your employee base.

**IMPLEMENTABLE:** Trainings run completely in the user's browser. This includes the hands-on challenges. All your staff require is a recent HTML5 compatible browser.

**VALUABLE:** Deliver practical and applicable capability development that positively impacts employee work-flow and organizational security, at a fraction of traditional IT training providers.

**PER-USER LICENSING:** Trainings are licensed per user and per training. No hidden fees or yearly costs. You have complete control over how you allocate your L&D and compliance spend.
